

The Differences Between a Cosmetic and General Dentist

Dr. Dell Ariel Goodrick, DDS, FAGD, has been selected as one of the best dentists in the United States by LLC, an independent firm that reviews the credentials of practitioners in fourteen professions to determine the “Best of Class” in each one.

Goodrick has been practicing dentistry in the Santa Clarita Valley for nearly 20 years since he graduated from Pacific Dental School in San Francisco.

“In this profession, you get to see how dentistry can change people’s lives. I participate in the ‘Give Back a Smile’ program for victims of domestic violence and when you see what is accomplished for them, it just really doesn’t get any better than that,” says Goodrick.

The Newhall dentist says the reason his dentistry is a cut above others is because of his continuing education, a fellowship with the academy of general dentistry (a designation attained by only 500 dentists in California), academy of laser dentistry training, double certification of Invisalign (clear invisible braces) and certification for adult oral conscious sedation, allowing him to prescribe pills to alleviate anxiety.

Goodrick is one of only 68,000 professional service providers chosen from more than 2 million actively practicing professionals in the United States to be listed on the “Best of Us” website.

The selection process is based on identifying those professionals who have continued their education, provided leadership in their industry and have been recognized by their peers, the industry and their community as the best.
